

The Bermuda Airport Authority (the “Authority”) is responsible for delivering a range of essential air navigation services at the L.F. Wade International Airport including air traffic control, ground electronics, meteorological and aeronautical information services. On behalf of the Government of Bermuda, the Authority also oversees the performance of Skyport and its 30-year concession to operate, maintain and redevelop the airport.

The Authority invites motivated and qualified applicants to join our team of dedicated professionals as an Air Traffic Engineering Technician.

This role supports the operation of a range of facilities, systems and equipment including but not limited to communication, navigation, surveillance; electronic; detection; display; meteorological; and information and communications technology equipment, by carrying out preventative and corrective maintenance services. Also evaluates, troubleshoots, repairs, installs, modifies, commissions and de-commissions equipment as required.

Duties include but are not limited to:

- Conducting daily inspections, performance tests, and maintenance activities for equipment and systems.
- Reporting unusual occurrences or difficulties to the Maintenance Coordinator.
- Enforcing safety protocols and maintaining a clean, hazard-free work area.
- Assisting with on-the-job training programs.
- Keeping the Maintenance Coordinator informed of unserviceable equipment, maintenance challenges, and spare parts requirements.
- Completing installations of systems, equipment, and data processing tools.
- Ensuring all ATE equipment operates to the satisfaction of its users.

Education, Experience and Skills:

- An Associate Degree or a City and Guilds Level 3 Diploma (or an equivalent recognized qualification) in Electronic Engineering or a related discipline.
- A valid Driver’s License (light truck /manual).
- A minimum of two years of recent and relevant experience.
- Experience working in the aviation industry and in ILS, RADAR and or VOR/DME systems, is preferred.

Additional Information:

- Must meet the physical demands of the role.
- Must be able to work rotating shifts, including weekends and public holidays, as assigned.
- Must be willing and able to work additional hours and be on call for unexpected outages or service requests outside regular hours.
- Administrator-level knowledge of Windows OS and a general understanding of other operating systems, applications, and software is preferred.

Why Join Us:

- Work in a critical aviation environment supporting international air traffic operations
- Opportunity to gain experience and training across diverse CNS/ATM and meteorological systems
- Be part of a small, highly skilled technical team with broad responsibilities
- Attractive opportunity for candidates seeking international experience in Bermuda

Shortlisted applicants may be required to go through a detailed vetting process and must be able to obtain a Skyport Restricted Airside Pass.
